kreevo.

Congrats! 🎉 You bought Crash Guard from Kreevo.

Never lose an After Effects project again — thank you for supporting an independent creator.

What's inside

- Automatic versioned backups (on by default)
- Protects unsaved (Untitled) projects too
- Works with OneDrive / Dropbox / Google Drive projects (backups kept locally)
- One-click restore from any recent backup
- Pre-render footage health check
- Live CPU/RAM monitor with plain-language warnings
- Project cleaner: unused footage, duplicates, caches

How to install

1. Download **CrashGuard.jsx**.
2. Copy it into After Effects' **Scripts/ScriptUI Panels** folder.
   Windows: C:\Program Files\Adobe\Adobe After Effects (version)\Support Files\Scripts\ScriptUI Panels
   Mac: Applications/Adobe After Effects (version)/Scripts/ScriptUI Panels
3. Restart After Effects and open **Window > CrashGuard.jsx**. Dock it anywhere.
4. That's it. Backups run automatically, even before you save your project.

Quick tips

- If After Effects crashes, open Crash Guard > Backup and restore the latest version.
- Unsaved projects go to Crash Guard's recovery folder. Use **Show backup folder** to find them, and File > Save As to move them anywhere.
- Check the load monitor when AE feels slow — it tells you why.
