kreevo.

Congrats! 🎉 You bought MotionType 2.0 from Kreevo.

26 text animations — one click, fully editable — thank you for supporting an independent creator.

What's inside

- 26 text animation presets: Rise, Blur In, Pop, Typing, Decode, Counter, Apple-style reveals, Flip, Spin, Mask Reveal and more
- Live preview + controls: Letter/Word/Line, direction, Bounce, Amount, Delay, Duration, Blur
- Glow (uses Deep Glow if you have it), Light Sweep, 13 built-in sound effects, colors, align & anchor point
- Stays editable after Apply ("MT" sliders in Effect Controls) — or Bake to keyframes
- After Effects 2019+, Windows & macOS · Free updates forever

How to install

1. Unzip **MotionType.zip**.
2. Windows: double-click **Install MotionType (Windows).bat**
   If Windows says "protected your PC": More info → Run anyway.
   Mac: open **Terminal**, type **bash** and a space, drag **Install MotionType (Mac).command** into the window, press Enter.
   Mac says "Apple could not verify… Move to Trash"? That's normal for indie tools — don't trash it, use the Terminal step above (more options in INSTALL.txt).
3. Open After Effects → **Window** → **Extensions** → **MotionType by Kreevo**.
4. Paste the **license key** from your Gumroad receipt email → **Activate**.
   Needs internet once. One key works on up to 3 computers.

Quick tips

- Select one or many text layers — or none, and Apply creates a new one from the text box.
- Pick a preset, tweak it in the live preview, click Apply.
- Apply again on the same layer to update it — no duplicates.
- Installer not working? INSTALL.txt has the manual steps.
