kreevo.

Congrats! 🎉 You bought Crash Guard from Kreevo.

Never lose an After Effects project again — thank you for supporting an independent creator.

What's inside

- Automatic versioned backups (on by default)
- One-click restore from any recent backup
- Pre-render footage health check
- Live CPU/RAM monitor with plain-language warnings

How to install

1. Unzip the download.
2. Follow the install steps in the guide included in the download.
3. Restart After Effects and open Crash Guard from the Window menu.
4. That's it — backups run automatically in the background.

Quick tips

- If After Effects crashes, open Crash Guard and restore the latest backup.
- Check the load monitor when AE feels slow — it tells you why.
